

# FabLite Tension Fabric FL-TF-10-14

## FL-TF-10-14

FabLite 10ft displays have unique stylistic features and shapes, are portable and easy to assemble. The aluminum tube frame features snap-buttons and/ or spigot connections and zipper pillowcase fabric graphics. All displays come in portable, wheeled transit cases. Simply pull the pillowcase fabric graphic(s) over the frame and zip.

## features and benefits:

- Premium aluminum tube frames with snap button / spigot assembly
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Two zipper pillowcase fabric graphics
- Kit includes: monitor kiosk featuring a medium monitor mount, can hold 32-55" monitor / max weight 40 lbs
- Lifetime limited hardware warranty against manufacturer defects

## dimensions:

### Hardware

Assembled unit:  
111.1" w x 96" h x 50.7" d  
2822mm(w) x 2439mm(h) x 1289mm(d)

Approximate weight with cases:  
150 lbs / 68 kg

### Shipping

Packing case(s):  
2 OCE Cases

Shipping dimensions:  
OCE: Expandable case length (l) may vary  
40" - 66" l x 18" h x 18" d  
1016mm-1677mm(l) x 458mm(h) x 458mm(d)

Approximate total shipping weight  
(includes cases & graphics):  
162 lbs / 74 kg

# Kit Assembly

## Step by Step

### Step 1.

Gather the components necessary to assemble Frame A. Assemble your frame following the order specified in the Labeling Diagram.

Please reference Connection Methods 1 and 3 for more details.

### Step 2.

Gather the components necessary to build Frame B. Assemble your frame following the order specified in the Labeling Diagram.

Please reference Connection Methods 1 and 2 for more details.

### Step 3.

Locate the fabric cover for Frame A. With the frame flat on the floor, pull the cover over the top of the frame. Zip the fabric cover to enclose the frame.

Zipper located on the bottom of Graphic A

### Step 4.

Locate the fabric cover for Frame B. With the frame flat on the floor, pull the cover over the top of the frame. Zip the fabric cover to enclose the frame.

Zipper located on the bottom of Graphic B

# Kit Assembly

## Step by Step

### Step 5.

Locate both LN114-S2's. Attach the foot to the bottom of the ES30-90B on the left side of Frame A. Tighten the screw on the side of the ES30-90B to lock it in place.

### Step 6.

Gather the LN114-S3 assembly, and 1 LN114 screw. Start by setting the hub on the foot into the ES30-90B. Next screw the foot into Frame B in the order shown on the right. Tighten the screw on the ES30-90B to lock in place.

### Step 7.

Gather the LN114-S2 assembly, and 1 LN114 screws. Attach the foot to the right side of Frame B, in order shown in the image to the right.

### Step 8.

Use the TCP-3030-R to combine both frames. Tighten on each side of the frame as shown in the image to the right.

Please reference Connection Method 4 for more details

# Connection Methods

**Connection Method 1: ES30**

For spigot connections, compress the unlocked connector and slide into the tube lock access hole. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten. Do not force the connection and be careful with the tube edges, they may be sharp. To disassemble, unlocked connector press the snap button and pull apart.

**Connection Method 2: Swage Tube with Snap Button**

Attaching the tube swage design end and snap button is easy - simply press the snap button in and slide it into the next tube. With the tube on, make sure the snap button comes out all the way through the tube hole.

**Connection Method 3: SILICONE EDGE FABRIC GRAPHIC**

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten.

**Connection Method 4: Tube Clamps**

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame's tubes in the clamp, be sure to lock securely, but do not over tighten.

# Monitor Kiosk

Kiosk displays are portable and easy to assemble. The aluminum extrusion frame features cam locks, tension glide connections and medium or large monitor mounts. This kiosk comes in a expandable shipping case.

## features and benefits:

- Premium aluminum extrusion frames with cam lock and tension glide assembly
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Kiosk Kit includes a medium or large monitor mount
- Lifetime limited hardware warranty against manufacturer defects

## dimensions:

## PM4S3-MK-M PM4S3-MK-L

Please note:  
This is the the kiosk frame build for  
either medium or large kit.

# Kit Assembly

## Step by Step

### Step 1.

Reference the image to the right. Locate the coded extrusions. Slide the PH2-300-TG connector into one end of the PM4S3-1200-A165-A165 so that it goes as deep as the internal pins. Connect the PM4S3-600-A165-A165 by sliding it over the PH2-300-TG. Repeat for this step for the second vertical.

### Step 2.

Collect your extrusions and handtool. Using the provided handtool, lock the extrusions into the back channel of the three channel PM4S3 faces as shown in the image below. Be sure the locks face toward the back of the assembly and do not over tighten.

### Step 3.

Locate the M5 thumbscrews, LN100s, and the PM4S3-MM stabilizing bases. Slide the LN100s into the middle channel of the PM4S3. Hand screw the M5 thumbscrews through the base holes and into the LN100 holes. Use the handtool to securely fasten the M5 Thumbscrews. Do not over tighten.

### Step 4.

Measure from the ground to the center of the hole in your main kit's graphic. Lock the center of your PH5-100-L-L into the PM4S3 stacks at the dimension height of the graphic hole. Do not over tighten.

# Kit Assembly

## Step by Step

### Step 5.

NOTE: Your main backwall assembly must be completed with graphics before completing this step of the monitor kit.

Lock your PM4S4-150 to the ends of the PH5-100-L-L. Do not over tighten.

### Step 6.

Set your monitor stand so that the extrusion arms fit through the graphic hole. Use the provided fastening hardware to complete your monitor stand. Slide the LN100 into the bottom center channel of the PM4S4-150. Next, slide the Square Head Bolt into the top center channel of the PM4S4-150. Apply the monitor bracket and spacer washer before fastening with the wingnut. Monitor mount may vary depending on size. Monitor not included.

### Step 7.

Setup is complete.
